With a strong foundation in computer science from a top-ranked university, I quickly adjust to new technologies and problem solving challenges. I push myself to deliver my highest quality work and achieve goals while always turning work into fun. Most of all, I love to collaborate because working with amazing people has been the highlight of all my prior experiences.

## SKILLS

---

- Proficient in C, C++, Java, Python, and R using IDEs like R-Studio, Visual Studio, and Xcode
- Led as front-end developer for semester-long group project creating web app with React, Node.js
- Completed additional learning outside degree in JavaScript, MongoDB, Python Pandas, SQL, Swift
- Experience coding in a Linux environment, including implementing a simplified version of shell
- Experience debugging code with GDB and checking memory use with Valgrind
- Experience with version control using GitHub for both solo and group projects

## EDUCATION
